Focusing on Marketing: The situation / survey and analysis

MACKEVISION

- **prices per image are constantly falling, but …**

- **… the need for product images is increasing, and so the need for keeping the control over all content**
  (different channels, e.g. POS, web, print, announcements)
- **… the process for image production is getting faster**
  (“time to market” is a competitive advantage)
- **… the process for content production is getting more complex**
  (Content localization and personalization)

F_BOX picture shooter **from Mackevision – what is it?**

- A Real-Time Web-Service, which enables the user to produce High-End 3D-Content fast, easy and cost efficient.
  You could say: an online accessible virtual photostudio

MACKEVISION

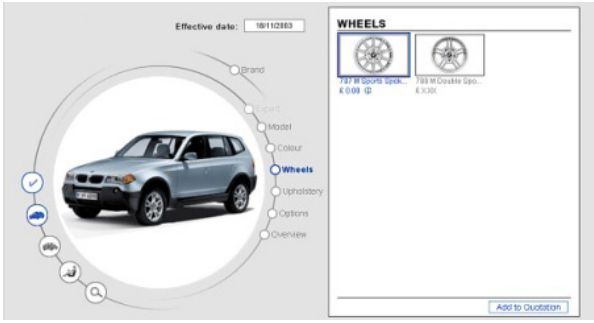
Where are we going?

MACKEVISION

The Aim: Single Source Publishing

Provide Media:

- To all channels
- Simultanious
- Centralized & controllable
- Consistant Quality
- Repeatable
- Fast
- Cost effective



Statement:

In Marketing for Products of all kinds, CGI will take almost the complete amount of content creation in the next 5 Years

- **Example: Mercedes-Benz, Virtual Garage Use**
